Tranque le miei sentimenti perchè sai che il mio post ieri pomeriggio era un mio peccato inspiegabile (e non ho tempo di rifarlo!) spero che questo post lo so in queste ore di verità e in ogni momento di respiro e di possibilità che mi trovai nella biblioteca e che mi veniva voglia di leggere in quella penombra di lettere trovate nella nostra volontà. Ti saluto e mi auguro che tu possa ascoltare il mio potere d'amore.Cloning and characterization of the cDNAs encoding subunit C, the precursor of cytochrome c oxidase, from the thermophilic bacterium *Aquaspirillum multifforme*. A 7.2 kb cDNA fragment coding for the large subunit of the cytochrome c oxidase (CcO) in the thermophilic bacterium *Aquaspirillum multifforme* was cloned. The cloned cDNA is 78.5% identical to the amino acid sequence deduced from the available genomic sequence of the same organism, suggesting that the cloned cDNA is the cDNA for subunit C of CcO. The cloned cDNA was sequenced and the sequence was confirmed by the sequence of the genomic DNA. A 618 bp open reading frame encoding a peptide of 205 amino acids with a molecular mass of 22,237 Da was found in the cloned cDNA. The cloned cDNA was ligated ca3bfb1094

They say the current system is “working against” the interests of first-time buyers and young couples who have struggled to find affordable homes. A report by the National Housing Federation (NHF) and the Centre for Cities is to be launched on Tuesday calling for urgent action, including the break-up of huge house-building firms to give local authorities more control over housing. According to the NHF report, there are 10,000 affordable homes for sale across England, but only 400,000 are required. Experts at the NHF, which represents leading housebuilders, landlords, councils and charities, say the current supply is not enough to meet demand, and that the situation is unsustainable.
