Singh, who is the third-longest serving military chief, succeeds Pranab Mukherjee who retired from the post last month. Army chief General V K Singh was sworn in as India's 16th President on Wednesday, a day after former Prime Minister Dr Manmohan Singh concluded his six-year term. "Received the oath of office and took the constitutional oath in the presence of Rashtrapati Bhavan," Singh posted on his Twitter account. He is the third-longest serving military chief after former chiefs BJS Bhat and A K Antony. Singh will be the President until January 2017. Under Indian law, he needs to be elected to a second term before taking office as President. "The President is commander-in-chief of the Army, Navy, Air Force and the civil administration. He is also the chief legal adviser to the President and the Army chief," a military expert said. "As the President is also the commander-in-chief, he is the commander of all the armed forces. There are cases where one has to carry out the orders of the President and if that order is not in line with the laws of the land, he has to get permission of the appropriate authority," he added. To be the President, Singh needs to be elected by a majority of the Parliament as he is not eligible for re-election. Earlier this month, Singh was elected the Bharatiya Janata Party's candidate for the Prime Ministerial post. Singh was born in Kurukshetra in 1922, he became the army chief in December 1992 after his father V K Singh was appointed the chief of Army Staff. You know what I'm talking about. I go into the NFL Draft looking for a "need" guy for my fantasy team. I see somebody who may be a good player but not worth drafting for my team (i.e. Malcolm Floyd, Jarius Wright) or a guy I don't like at all (i.e. Patrick Chung). Then in one week, I end up with one or two players who make my team better than it was. You don't believe me? Just ask the Philadelphia Eagles. Maybe you're thinking I'm being fair to them. Don't be. They're complete morons for not drafting the player they should have drafted. And then I end up with a bad game or two. With that in mind, here are the players I'm targeting in week 2. Pick them, and you may beat the system. Sustained response to risperidone in a schizophrenic patient with panic attacks. This report describes a patient with a panic disorder who failed to respond to four of six trials of imipramine and who, in turn, failed to respond to clomipramine. He had earlier failed to respond to conventional antipsychotic medications. Risperidone produced marked and sustained improvement in panic and depressive symptoms. Side effects included sedation and sexual dysfunction. Risperidone may be useful in the management of patients with panic disorder and comorbid schizophrenia.Q
