Q: How does $1/2 = 0$? Well for one I'm not sure about. My teacher explained it by saying that 4 is also 0 for the same reason $1/2$ is 0. I guess he was just telling me to remember that. But that doesn't really make sense. Why is 4 0? How does $1/2 = 0$? A: $4=0\times 1+1\times 1+0\times 2+1\times 2+0\times 4$ That is, it can be represented as a sum of four equal amounts. Similarly, $1/2=0\times \frac{1}{2}+0\times \frac{1}{2}+0\times \frac{1}{2}+0\times \frac{1}{2}$ That is, it can be represented as a sum of four equal amounts. It is a pattern. If a number can be represented as a sum of four equal amounts, then we can say that it is equal to 0 . A: The word "equal" is used in two ways. In the additive sense, you are saying $1/2$ is an amount of the form $x\times 1+y\times 2$ where x and y are rational numbers. In the multiplicative sense, you are saying that $1/2$ is an amount of the form $a\times \frac{1}{2}+b\times \frac{1}{2}$ where a and b are rational numbers. $1/2$ in the

additive sense is not equal to 0 . You might have been taught that $\frac{1}{2} = 0$ is a rational number. But in the additive sense, $\frac{1}{2}$ is not equal to 0 . $\frac{1}{2} = \frac{1}{2} + \frac{1}{2}$. $1/2$ in the multiplicative sense is equal to 0 for the same reason $3/2$ is equal to 0 . $3/2$ is a rational number. $\frac{3}{2}$ is not. $\frac{3}{2} = \frac{3}{2} + \frac{3}{2}$. Pros: All the 6d1f23a050
