A: No. An MOOC, an online course, is an evolving, opt-in, collaborative environment, not an exam. So no, you have not studied for it at all. No, you cannot transfer knowledge gained to another class (other than another online class). No, you cannot look up the class, look at the answers, or ask questions, even in chat. No, you cannot get any help, even in chat. No, you cannot look at the MCQs or anything on the course webpage. For each course, you are a member of a cohort, and, to continue, you cannot show up to the course with your exam prep tools. The progression of the course is designed to do more of what it is supposed to do than what you would do if you weren't attending the class. Your exams are fully-online, as are the questions, regardless of what method you choose to study. If you would like to use the same system for the exam that you use for the reading and lab preparation, then you can; but there is no benefit in expecting to receive answers to the online quiz questions or the lab questions. Since the online quiz and lab questions are here, and since the answers are here, and since you will be answering the quizzes yourself, then you should be able to see those that you have answered, and to see who has not answered and who has. I would strongly recommend that you not attempt this exam without having done all of the reading and labs that are required, so that you have a clear sense of what you are being asked and can prepare for and answer the questions correctly. If, at your whim, you just want to show up to the class and get a grade, then this is a valid course and those who took the same course you are taking are your classmates. The course is designed to require much more learning than that. A: The question that you asked is not quite specific, but let's try: Where can I find her 5th chapter and questions from this book? From where do you want to get this? You should have her book itself. If you want a complete free exam which is organized and includes questions you should understand then you can buy her book. You don't need to rely on any kind of resource for writing exams. How do I get this?
