Wikipedia.org Learning AutoCAD free AutoCAD R2018 is the 18th version of Autodesk's award-winning software. It is the first release in the design family of AutoCAD software to use the same robust technology platform as AutoCAD LT and AutoCAD Architecture. Over the past several years, AutoCAD has become the industry standard for architects, engineers, and other designers for both 2D and 3D vector and raster-based drawing and modeling. AutoCAD R2018 (left), AutoCAD R2012 (center), and AutoCAD LT 2018 (right) With a single license, AutoCAD users can view and edit 2D and 3D designs. Once a model is created, they can then print, email, or use other software to share their work with other colleagues. Users can save and export in the native AutoCAD format, DWG (Microsoft Windows), DXF (Macintosh), or SVG. In addition to its traditional applications, AutoCAD R2018 includes new features like the BIM Portal and BIM Cloud for 3D, plus mobile and web apps. A BIM Portal enables modelers to collaborate in a shared space AutoCAD R2018 now has the ability to do two-way data exchange, including read and write, with industry standard file formats for the purpose of sharing data over cloud-based tools and the internet. The latest release of the software also allows for collaboration, as it now has the ability to do two-way data exchange, including read and write, with industry standard file formats for the purpose of sharing data over cloud-based tools and the internet. "The connectivity to the cloud and cross-platform experience in R2018 are what enable us to scale AutoCAD for design professionals globally," said Steve Singer, senior vice president and general manager of the Architecture and Engineering Division, Autodesk. "The ability to have a single license that spans multiple platforms gives professionals a level of confidence and simplification that helps them move their work forward."AutoCAD R2018 incorporates the latest release of the Design and Development Environment (DDE), including the new features and functionality of the 3D BIM Cloud technology. A feature-rich set of productivity and modeling enhancements are available in AutoCAD R2018, including new tools and improvements to existing features.AutoCAD R2018 also includes a new 2D viewport, 2D annotation tools, and

Capabilities AutoCAD's main capabilities are general purpose drawing and design software. It is capable of creating a wide range of 2D and 3D drawings and objects, such as architecture, civil engineering, electrical and mechanical. Some of AutoCAD's more unique capabilities include the ability to handle and display 3D drawings and create animations. This is accomplished through the use of components like the dynamic block, spline, surface and mesh. Autodesk also provides a 3D cad graphics technology that provides the ability to import the same 3D elements used in AutoCAD to an HTML 5 web browser for easier viewing and manipulation. AutoCAD is also capable of reading and writing files in over one hundred file formats. These include a wide variety of industry-standard file formats, including DWG, DGN, DXF, DGN, DXR, DGN/DXF, DWG, DWF, IGES, VRML and PLY, as well as AutoCAD's own format, ACIS. The software also supports a number of vendor file formats, including those from Dassault Systemes and UGent. AutoCAD also supports a number of Computer-Aided Design (CAD) features, such as AutoCAD Construction Drawings, Analysis, Bridges, Charts, Graphics, Imagery, Installing, Planning, and 2D Dimensional Constraints, and 3D Constraints. In addition, it provides additional functionality, including a feature called "Distribute Objects," which allows certain parts of a drawing to be linked to another drawing and edited separately. AutoCAD has a number of features for drawing freehand. It can be used with a digitizer, trackball or mouse. The user can modify and scale the drawing using the "move" and "resize" features. It can also have objects automatically redrawn using Bounding Box, or "bbox" mode. The "bbox" mode creates a rectangle around the actual drawing and re-draws the section using the drawing's scale, rotation and translation. When using freehand, AutoCAD can control the coordinate system and set the drawing origin. This allows the user to create precise drawings, such as a plan drawing, using a large scale. The software supports customization using the objectARX framework, which is customizable in LISP. AutoCAD 2009 also introduced a new ribbon interface. Licensing 5b5f913d15

Rashida Carroll, 30, was reunited with her family in the USA after being taught by former mob associates how to work as a "snitch" or rat in the Cosa Nostra mob. New York police arrested Rashida Carroll on Monday after she posed as a missing person for six years - and after she contacted ex-mob associate Roger "Loopy" Cappella. Mr Cappella, 56, contacted New York police after he noticed Carroll's picture on the "missing person" website and recognised her as a girl who had been kidnapped and taught how to "give up snitches" at a notorious Cosa Nostra mob school in New Jersey. Scroll down for video Rashida Carroll, 30, was reunited with her family in the USA after being kidnapped and taught how to work as a "snitch" by an ex-mob associate (pictured) Mr Cappella (pictured, left, with Carroll in 2012) tipped off New York police after he noticed Carroll's picture on the "missing person" website and recognised her as a girl who had been kidnapped Mr Cappella told the New York Daily News: 'I knew that girl and she was being trained to become a snitch. I was like, "Oh no, I know this girl".' Mr Cappella contacted Carroll after she contacted him asking for money to help bail her husband out of jail. The New Jersey-based mob associate was the last person to speak to Carroll before she disappeared in 2012. He contacted New York police on August 10 to inform them that Carroll had contacted him while working as a'snitch' for the mob. In a statement, Carroll's family said: 'We are beyond thrilled with the reunion. 'Our family was able to leave the nightmare of Rikers Island with Rashida. We are elated that Rashida is finally home. 'Our family is so thankful to the law enforcement agencies who are working to apprehend her kidnappers and bring her home to us. 'We are glad to now be able to begin to live our lives
